SMS Customer Relationship Management

OVERVIEW

Customer Relationship Management software is deployed globally to allow enterprises to build knowledge of their clients and ensure their organization reacts to customer driven events in a timely manner. Using SMS as a communications channel speeds up activities triggered in response to customer driven events.

SMS

Our software add-ins provide ready to go connectivity to Salesforce and Microsoft Dynamics CRM. You can also use our software to connect other CRM solutions to SMS quickly and easily. We offer step by step guidance on how to connect. If you are technically minded, visit our developers center to learn more about our API's.

UPGRADE WITH SMS+

SMS+ enhances regular SMS. With longer message length and rich content, you also gain the ability to brand your messages with your corporate logo. You can encrypt your messages, and set them to expire after a certain time. Messages sent via SMS+ can be read only by the intended user, providing the ideal solution for your more sensitive communications.
