# SMS Order confirmation / order status

### OVERVIEW

In an information driven world, customers expect up to the minute updates on the progress of their orders and service items. SMS is the ideal medium for sending progress updates to let your customers know their orders are on track.

### SMS

SMS can take a lot of the work out of these notifications as messages can be automatically triggered at certain stages of the process. We can show you how. These automated messages can come directly from your software, meaning that with very little effort, you can ensure that your customers are kept fully aware of everything that is going on in a way that is convenient for them.

### UPGRADE WITH SMS+

SMS+ enhances regular SMS. Adding longer message length and allowing rich text content, you also gain the ability to brand your messages with your corporate logo. You can encrypt your messages and set them to expire after a certain time. Messages sent via SMS+ can be read only by the intended user, providing the ideal solution for your more sensitive business communications.
