## SMS Ticket and Voucher Codes

#### OVERVIEW

Confirming event bookings and providing customers with a booking reference are key steps in processing customer orders. SMS can be used to deliver this information to the mobile handset. We have software that will connect your IT systems. We can show you how.

#### SMS

Send a message with booking reference, ticket number or other confirmatory information. Benefit from delivery receipts so that you know that your information has been delivered.

#### UPGRADE WITH SMS+

SMS+ enhances regular SMS. Adding longer message length and allowing rich text content, you also gain the ability to brand your messages with your corporate logo. You can add barcodes or QR codes. You can encrypt your messages and set them to expire after a certain time. Messages sent via SMS+ can be read only by the intended user, providing the ideal solution for your more sensitive business communications.
