SMS Trigger Messages

OVERVIEW

If you have the situation where customers, staff or users ask the same information, you may want to set up standard replies to information requests.

Example: text TENNIS to get tennis club opening hours and contact information, SWIM for the swimming pool or HOCKEY for field hockey information for your local sports facility.

SMS

Use SMS to allow people to request information on a pre-set topic. The request is made by a single word SMS sent to us by your users from their cell phones. This is called a keyword. Set up pre-set replies, and then allow us to send your replies when we receive keyword requests from your users.

UPGRADE WITH SMS+

SMS+ enhances regular SMS. Adding longer message length and allowing rich text content, you also gain the ability to brand your messages with your corporate logo. You can encrypt your messages and set them to expire after a certain time. Messages sent via SMS+ can be read only by the intended user, providing the ideal solution for your more sensitive business communications.
